

Modula LIFT

Think Vertical, Think Modula

NEW GENERATION

modula.com

Recover
space and
increase
productivity

Invest in ergonomics
and flexibility!

Modula vertical lift modules are the ideal solution to recover space on your shop-floor or distribution area, while improving the speed and ergonomics of picking operations and the safety of your operators. 30 years of experience and continuous research have enabled us to develop a highly technical product in which safety and intelligent design are the main focus.

- 1. RECOVER SPACE
- 3. SAVE TIME
- 5. REDUCE RISKS

- 2. INCREASE SECURITY
- 4. IMPROVE EFFICIENCY
- 6. BOOST INVENTORY MANAGEMENT

THROUGHPUT OF UP TO 120 TRAYS/HOUR

Technical characteristics

- Unit heights: from 3,300 mm to 16,100 mm
- Unit height increment: 200 mm
- Tray storage pitch: 25 mm
- Tray widths: from 1,900 mm to 4,100 mm
- Tray depths: 654 mm & 857 mm
- Net tray payload: 250-500-750-990 kg
- Net total payload: from 40,000 kg to 80,000 kg depending on model and configuration
- Gross total payload: from 50,000 kg to 90,000 kg depending on model and configuration
- Maximum stackable height: 695 mm (bay S) / 895 mm (bay M) / 1,295 mm (bay XL)

- Throughput: up to 120 trays/hr (depending on the configuration)
- Operator interface: industrial console with 10.4' touch screen (Copilot)
- Number of bays: up to 3, also above ground level and on the same side
- Types of bay: internal or external with single or dual delivery level
- Minimal energy consumption
- Automatic return tray weight check
- Dynamic tray storage height
- Load-bearing structure in galvanised steel
- Eagle steel-reinforced toothed belt transmission
- Elevator guide system with 6 rollers per side
- Multiple payload tray management

Our advantages

Internal or external, single or dual delivery bays

Modula offers 4 different bay configurations.

Internal bays are the ideal solution when you need to limit the floor space occupied by the machine.

The external bay configuration makes the operator's work easier and improves ergonomics. It is the ideal solution when using mechanical equipment, such as lift trucks, manipulators or bridge cranes.

A single delivery level is the best solution when the machine will only be used moderately, or when the operator picking time is very short.

Dual delivery is the ideal configuration for a fast-paced picking operation, as it reduces down time.

SINGLE INTERNAL DELIVERY

SINGLE EXTERNAL DELIVERY

DUAL INTERNAL DELIVERY

DUAL EXTERNAL DELIVERY

Maximum payload for every tray width

Every model in the Modula Lift range offers the maximum load capacities for all tray sizes, independently of tray width and depth.

Up to 990 Kg across the entire tray range

Up to 4,100 mm wide

Copilot operator console

The Copilot is a rugged operator interface, suitable for any industrial environment. With its 10.4" colour display, touch screen technology and intuitive software, the console is extremely user-friendly.

Modula WMS software

Modula WMS is the ideal software for the management of any type of automated or manual warehouse. The perfect complement to Modula Lift, it has been designed to easily interface with ERP systems of all types.

Operator safety

All Modula vertical units are equipped with physical and optical safety barriers to render the working environment 100% safe for operators. Thanks to these features, Modula units have obtained TÜV-GS certification, guaranteeing conformance to current European safety standards.

What can you store in a Modula?

A vertical lift module is an automated storage system in which materials of different weight, height and volume can be stored and picked. It is a solution that can be employed in any industrial sector and even in several departments of the same company to fulfil different functions. Modula units can be used to store components for use in production or as replacement parts, consumer products for distribution or sale, tools utensils, cosmetics, pharmaceuticals, electrical and electronic components, to give just a few examples. The main advantages of this technology are that it offers significant space savings and faster picking, while improving inventory

traceability and availability, and safety for both items and operators. Modula can be easily integrated with other systems and inserted in your company's workflow to optimise operations and improve efficiency. The vertical lift module can be integrated with existing systems, such as robots, rollerways, Put-to-Light systems, manipulators, zero-weight lifting units and the company's ERP. With Modula software, you can manage registry data of materials and users, production orders, stock levels, as well as carry out inventories and create dedicated analyses and reports using specific tools.
