# STORAGE SYSTEMS WITH STACKER CRANE

Optimization of storage and production processes has a significant impact on the efficiency and flexibility of production, and on the costs of internal transportation. Such optimization lets companies achieve competitive advantage. In modern production facilities, a warehouse is not only a place where products are stored, but it is actually the backbone determining the arrangement and improvement of the operation of the machinery used in the process line.

A storage system with stacker crane is a solution that makes storage and internal circulation of products and materials efficient, reliable, and safe in use and operation.

-  **SAVING**  
on warehouse space
-  **SAVING ON TIME**  
of logistics operations
-  **INTEGRATION WITH SYSTEMS**  
ERP, WMS, MRP class
-  **INCREASED SAFETY**  
in production process
-  **EASY AND FAST ACCESS**  
to the stored materials and tools
-  **FULL AUTOMATION**  
production systems able to work in automatic mode
-  **FLEXIBILITY**  
structure suited to individual customers' needs
-  **INTEGRATION**  
with production line machinery

TECHNICAL DATA			
TYPE OF STORED GOODS/MATERIALS	TRAY DIMENSIONS *)	MAX. LOAD CAPACITY	SYSTEM HEIGHT
STEEL SHEETS	2 m x 1 m 2.5 m x 1.25 m 3 m x 1.5 m 4 m x 2 m 6 m x 2 m	up to 5000 kg	up to 20 m
LONG GOODS (bars, profiles, pipes)	6.1 m x 0.62 m 12.1 m x 0.62 m	up to 5000 kg	up to 20 m
TOOLS, DIES, COMPONENTS	depending on the dimensions of the stored products	up to 5000 kg	up to 20 m

\*) other dimensions available upon request
